

## Daniels delivers laundry's latest evolution - the innovation of LG.

The commercial laundry series from LG offers state-of-the-art technologies with superior reliability and the greatest energy efficiencies. Common area laundry rooms equipped with LG equipment are the performance-driven solution delivering the better wash results, sustainability and dependability.

- **Industry-leading energy efficiencies**

LG streamlines energy usage through its front load design and innovative direct-drive motor effectively reducing consumption and decreasing your carbon footprint. The card and coin washers advanced performance and largest load capacity in the industry were designed to consume less water and energy per pound of laundry than any other commercial front-load brand.

- **Greater reliability and superior design**

The LG brand evokes expertise and excellence in appliances. The new, enhanced laundry systems are no exception and have been designed to meet this high standard. LG appliances are more dependable, quieter and have a longer life – guaranteeing better operations.
